7/21/83 S4255-3.1 A

1980 CENSUS OF POPULATION AND HOUSING

SAMPLE COUNT TABLES
FOR
THE STATE OF CONNECTICUT

SOCIO-ECONOMIC CHARACTERISTICS
EDUCATION STATUS

FORMAT: The report is divided into the following sections by geographic areas:

- Section 1. STATE OF CONNECTICUT
- Section 2. REGIONAL PLANNING AREAS
- Section 3. HEALTH SERVICE AREAS
- Section 4. LABOR MARKET AREAS
- Section 5. COUNTIES
- Section 6. MUNICIPALITIES
- Section 7. NON-CONTIGUOUS BOROUGHS AND CITIES

Within each section data for each geographic area is summarized by a set of 10 tables presented on one page.

Within each section, the set of tables is arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Hartford. Geographic codes are also listed as appropriate. Pages in this document are numbered within sections.

FOOTNOTES: The footnotes are contained on single pages at the end of each section.

TABLE NUMBERS: The table numbers used are identical to those utilized by the U.S. Bureau of the Census on the summary tape files, printed reports, and microfiche. When more than one table number is shown with a table heading, the data in that table were combined or derived from two or more tables.

SOURCE: Summary Tape File 3A, Bureau of the Census, U.S. Department of Commerce

ISSUED BY: The Connecticut Census Data Center
Comprehensive Planning Division, Office of Policy and Management
80 Washington Street, Hartford, CT 06106-4459, (203) 566-8285
March, 1983

ACKNOWLEDGEMENT: CENSPAC, a software package produced by the Bureau of the Census, was used to generate the tables contained in this report. The output code used was initially developed by the State and Regional Program Staff, Data User Services Division, Bureau of the Census, and modified by staff at the Connecticut Census Data Center.

Connecticut: 1980 Census of Population and Housing
Socio-Economic Characteristics -- Education Status
Sample Counts from Summary Tape File 3A, U.S. Bureau of the Census

March, 1983

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data; information from the "complete count" and from the "sample." The data from questionnaires used to enumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count," where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household, the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(55) Race and Spanish Origin data is available in both Summary Tape File 1 (STF1) and Summary Tape File 3 (STF3). Race and Spanish Origin data from STF1 is based on the complete count of the population. This same data from STF3 is based upon a sample of the population. Therefore, the numbers for the same categories from both tape files may differ. Data users are encouraged to use STF1 Race and Spanish Origin data when comparing to other complete count data, and use STF3 Race and Spanish Origin data when doing comparisons with other sample data.

In addition to the differences that may occur between complete count data and sample data, users should be aware of possible re-assignments or different groupings of data made within STF3 (e.g. Data from "Other" could be re-assigned to "White"). These re-assigments of sample Race and Spanish Origin data have resulted from a more thorough review and additional editing to resolve inconsistent or incomplete responses, and to re-assign write-in entries from the "Other" category.

SECTION 2. REGIONAL PLANNING AREAS

FORMAT: Within this section data for each regional planning area is summarized by a set of 10 tables on one page.

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Capitol Regional Planning Area.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

Connecticut: 1980 Census of Population and Housing
Socio-Economic Characteristics -- Education Status
Sample Counts from Summary Tape File 3A, U.S. Bureau of the Census

March, 1983

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data; information from the "complete count" and from the "sample." The data from questionnaires used to enumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count," where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household, the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(55) Race and Spanish Origin data is available in both Summary Tape File 1 (STF1) and Summary Tape File 3 (STF3). Race and Spanish Origin data from STF1 is based on the complete count of the population. This same data from STF3 is based upon a sample of the population. Therefore, the numbers for the same categories from both tape files may differ. Data users are encouraged to use STF1 Race and Spanish Origin data when comparing to other complete count data, and use STF3 Race and Spanish Origin data when doing comparisons with other sample data.

In addition to the differences that may occur between complete count data and sample data, users should be aware of possible re-assignments or different groupings of data made within STF3 (e.g. Data from "Other" could be re-assigned to "White"). These re-assigments of sample Race and Spanish Origin data have resulted from a more thorough review and additional editing to resolve inconsistent or incomplete responses, and to re-assign write-in entries from the "Other" category.

SECTION 3. HEALTH SERVICE AREAS

FORMAT:	Within this section, data for each health service area is summarized by a set of 10 tables on one page. Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: North Central Connecticut Health Service Area.
FOOTNOTES:	The footnotes are contained on a single page at the end of this section.

Connecticut: 1980 Census of Population and Housing
Socio-Economic Characteristics -- Education Status
Sample Counts from Summary Tape File 3A, U.S. Bureau of the Census

March, 1983

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data; information from the "complete count" and from the "sample." The data from questionnaires used to enumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count," where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household, the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(55) Race and Spanish Origin data is available in both Summary Tape File 1 (STF1) and Summary Tape File 3 (STF3). Race and Spanish Origin data from STF1 is based on the complete count of the population. This same data from STF3 is based upon a sample of the population. Therefore, the numbers for the same categories from both tape files may differ. Data users are encouraged to use STF1 Race and Spanish Origin data when comparing to other complete count data, and use STF3 Race and Spanish Origin data when doing comparisons with other sample data.

In addition to the differences that may occur between complete count data and sample data, users should be aware of possible re-assignments or different groupings of data made within STF3 (e.g. Data from "Other" could be re-assigned to "White"). These re-assigments of sample Race and Spanish Origin data have resulted from a more thorough review and additional editing to resolve inconsistent or incomplete responses, and to re-assign write-in entries from the "Other" category.

SECTION 4. LABOR MARKET AREAS

FORMAT: Within this section data for each labor market area is summarized by a set of 10 tables on one page.

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Ansonia Labor Market Area.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

Connecticut: 1980 Census of Population and Housing
Socio-Economic Characteristics -- Education Status
Sample Counts from Summary Tape File 3A, U.S. Bureau of the Census

March, 1983

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data; information from the "complete count" and from the "sample." The data from questionnaires used to enumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count," where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household, the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(55) Race and Spanish Origin data is available in both Summary Tape File 1 (STF1) and Summary Tape File 3 (STF3). Race and Spanish Origin data from STF1 is based on the complete count of the population. This same data from STF3 is based upon a sample of the population. Therefore, the numbers for the same categories from both tape files may differ. Data users are encouraged to use STF1 Race and Spanish Origin data when comparing to other complete count data, and use STF3 Race and Spanish Origin data when doing comparisons with other sample data.

In addition to the differences that may occur between complete count data and sample data, users should be aware of possible re-assignments or different groupings of data made within STF3 (e.g. Data from "Other" could be re-assigned to "White"). These re-assigments of sample Race and Spanish Origin data have resulted from a more thorough review and additional editing to resolve inconsistent or incomplete responses, and to re-assign write-in entries from the "Other" category.

SECTION 5. COUNTIES

FORMAT: Within this section, data for each county is summarized by a set of 10 tables on one page.

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Hartford County.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

Connecticut: 1980 Census of Population and Housing
Socio-Economic Characteristics -- Education Status
Sample Counts from Summary Tape File 3A, U.S. Bureau of the Census

March, 1983

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data; information from the "complete count" and from the "sample." The data from questionnaires used to enumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count," where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household, the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(55) Race and Spanish Origin data is available in both Summary Tape File 1 (STF1) and Summary Tape File 3 (STF3). Race and Spanish Origin data from STF1 is based on the complete count of the population. This same data from STF3 is based upon a sample of the population. Therefore, the numbers for the same categories from both tape files may differ. Data users are encouraged to use STF1 Race and Spanish Origin data when comparing to other complete count data, and use STF3 Race and Spanish Origin data when doing comparisons with other sample data.

In addition to the differences that may occur between complete count data and sample data, users should be aware of possible re-assignments or different groupings of data made within STF3 (e.g. Data from "Other" could be re-assigned to "White"). These re-assigments of sample Race and Spanish Origin data have resulted from a more thorough review and additional editing to resolve inconsistent or incomplete responses, and to re-assign write-in entries from the "Other" category.

SECTION 6. MUNICIPALITIES

FORMAT: Within this section, data for each municipality is summarized by a set of 10 tables on one page.

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Andover.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

Connecticut: 1980 Census of Population and Housing
Socio-Economic Characteristics -- Education Status
Sample Counts from Summary Tape File 3A, U.S. Bureau of the Census

March, 1983

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data; information from the "complete count" and from the "sample." The data from questionnaires used to enumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count," where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household, the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(55) Race and Spanish Origin data is available in both Summary Tape File 1 (STF1) and Summary Tape File 3 (STF3). Race and Spanish Origin data from STF1 is based on the complete count of the population. This same data from STF3 is based upon a sample of the population. Therefore, the numbers for the same categories from both tape files may differ. Data users are encouraged to use STF1 Race and Spanish Origin data when comparing to other complete count data, and use STF3 Race and Spanish Origin data when doing comparisons with other sample data.

In addition to the differences that may occur between complete count data and sample data, users should be aware of possible re-assignments or different groupings of data made within STF3 (e.g. Data from "Other" could be re-assigned to "White"). These re-assigments of sample Race and Spanish Origin data have resulted from a more thorough review and additional editing to resolve inconsistent or incomplete responses, and to re-assign write-in entries from the "Other" category.

SECTION 7. NON-CONTIGUOUS BOROUGHS AND CITIES

FORMAT: Within this section, data for each non-contiguous borough and city is summarized by a set of 10 tables on one page.

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Willimantic City.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

Connecticut: 1980 Census of Population and Housing
Socio-Economic Characteristics -- Education Status
Sample Counts from Summary Tape File 3A, U.S. Bureau of the Census

March, 1983

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data; information from the "complete count" and from the "sample." The data from questionnaires used to enumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count," where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household, the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(55) Race and Spanish Origin data is available in both Summary Tape File 1 (STF1) and Summary Tape File 3 (STF3). Race and Spanish Origin data from STF1 is based on the complete count of the population. This same data from STF3 is based upon a sample of the population. Therefore, the numbers for the same categories from both tape files may differ. Data users are encouraged to use STF1 Race and Spanish Origin data when comparing to other complete count data, and use STF3 Race and Spanish Origin data when doing comparisons with other sample data.

In addition to the differences that may occur between complete count data and sample data, users should be aware of possible re-assignments or different groupings of data made within STF3 (e.g. Data from "Other" could be re-assigned to "White"). These re-assigments of sample Race and Spanish Origin data have resulted from a more thorough review and additional editing to resolve inconsistent or incomplete responses, and to re-assign write-in entries from the "Other" category.
